

INTEGRATED MOBILE FORMS SOFTWARE SOLUTION

Construction companies are using Form.com for

Incident Reports

- Submitted forms show where and when an employee filled them out
- Take and place pictures directly into the form
- Route the response to the right people, in and outside of the company

Change Orders

- Instantly alert appropriate parties after submission
- Capture e-signatures and with time and date stamps
- Configure approval processes for each job

Inspections

- Use smart phones or tablets for all paper based inspections
- Automate calculations, scoring, and recommendations
- Show regulations and recommendations for specific scenarios

Team Management

- Manage rights and permissions for forms and reports
- Assign follow up tasks and track progress
- Automate workflows to speed operations
