

Form.com for RESTAURANTS

INTEGRATED MOBILE FORMS SOFTWARE

Restaurants are using Form.com for:

General Operational Audits

- Offline functionality allows audits to be done without an internet connection
- Automated Action Plans can be created as a whole document or individual tasks with due dates and criticality levels
- Pictures can be embedded directly into sections of the form and drawn over with a finger, stylus, or mouse (desktop)
- Time & date stamps, GPS location, and auditor/store/GM info can be automatically filled in

Food Safety Inspections

165 °F

- Pictures of violations can be embedded into sections of the form and drawn over for future training purposes
- Field validation can keep inaccurate temperatures from being entered (e.g. 1000 degrees)
- Forms can instantly alert user to failing criteria and provide corrective action or reference material
- Appropriate personnel can receive instant alerts from failures

Brand Compliance Audits

- Platform's flexibility allows for quick creation of ad hoc forms and inspections
- Pictures can be embedded directly into the form and drawn over to highlight violations
- GPS location and time & date stamps provide authenticity
- Allows for "bring your own device" for temps and outside agencies

Executive Dashboards

- Plot locations on map and easily highlight performing and underperforming stores
- Click and drag to drill down into datasets and individual inspections
- Quickly understand if things are getting better or worse: by region, franchise group, management team, etc.
- Track trends and forecast problems
