

## KEY SURVEY DATA EXPORT CAPABILITIES

### Standard Data Export Options

<b>Excel</b> <b>.xls</b>	<ul style="list-style-type: none"> <li>Export row data as labels, values or both; summary report and links to unique responses can be included.</li> </ul>
<b>Comma delimited</b> <b>.csv</b>	<ul style="list-style-type: none"> <li>Export row data as labels, values or both; summary report and links to unique responses can be included.</li> <li>Can be imported back into current or similar formats.</li> </ul>
<b>XML Schema</b> <b>.zip with .xml/.xsd</b>	<ul style="list-style-type: none"> <li>Exporting produces two XML files: surveys.xml and responses.xml.</li> <li>Surveys.xml contains 4 tables that describe the structure of your forms and surveys.</li> <li>Responses.xml contains tables with data concerning respondents and their answers to questions.</li> <li>Each of the files are accompanied by an .XSD file that describes the data format for the XML files.</li> </ul>
<b>SPSS Statistics</b> <b>.sav</b>	<ul style="list-style-type: none"> <li>Export row data as labels, values or both. Labels and values can be toggled for multi-choice question types.</li> <li>20+ encodings available.</li> <li>SPSS version 16.0 or higher is required.</li> </ul>
<b>Portable Document Format</b> <b>.pdf</b>	<ul style="list-style-type: none"> <li>Convert summary reports into black and white or color PDF.</li> <li>Both portrait and landscape orientations are available.</li> </ul>

- Data export can be scheduled and automated so the system will place files of any format into an indicated S/FTP location on a regular basis.
- Both "Completed" and "In Progress" responses can be included in the data export.
- Question text, answer options, and column headers can be customized, hidden, or filtered to only export the required data.
- Filters can be based on any combination of data or submission dates.
- API calls return data as OOP objects.
- Along with collected data, responses, and distribution statistics, you can also export tasks and account audit logs.

## Advanced Data Export Options

<p><b>Plugins</b></p> <p><i>Applied directly to the survey once, then triggered upon survey submission.</i></p>	<ul style="list-style-type: none"> <li>• <b>Remote Data Sender</b> allows you to send specified information to a third party application in the form of an HTTP(S) request (by sending a custom link to a remote URL).</li> <li>• <b>Logical Remote Data Sender</b> allows you to send specified information to a third party application in the survey of an HTTP(S) request (by sending a custom link to a remote URL) depending on the data collected in the survey.</li> <li>• <b>Remote Data Sender Plugin (XML/JSON)</b> sends a post request that contains data in XML/JSON format to a third party application.</li> </ul>
<p><b>SOAP API</b></p>	<ul style="list-style-type: none"> <li>• Common services for getting data back are Survey Design and Survey Result Management.</li> </ul>
<p><b>Remote Data Retrieval</b> <i>HTTP(S) requests for remote file exports.</i></p>	<ul style="list-style-type: none"> <li>• Export files in Excel, CSV, XML and SPSS formats.</li> </ul>
<p><b>(S)FTP Synchronization</b></p>	<ul style="list-style-type: none"> <li>• Data export can be scheduled and automated so that the system will send Excel, CSV, XML, SPSS or PDF files into an indicated (S)FTP location on a regular basis.</li> <li>• Local data tables (such as Contact Manager and Data Models) can be maintained (exported and/or updated) through the (S)FTP synchronization.</li> </ul>
<p><b>Custom Synchronization</b></p>	<ul style="list-style-type: none"> <li>• Implement custom JavaScript within surveys.</li> <li>• WorldAPP has its own JavaScript library to help with custom development.</li> </ul>

- Multiple plugins can be set up on a single survey, then triggered in response to different data combinations.
- For API usage, a combination of the Respondent Id Saver and Remote Data Sender plugins helps create unique IDs and synchronize them with your database in real-time.
- A JavaScript section is open and available on the application account side.
