

The Key Survey Mobile app is an extension of the Key Survey Platform designed for accessing and administering surveys and related tasks remotely from smart phones and tablets.

In areas where internet is not available, Key Survey Mobile lets you collect and store survey submissions on your mobile device, then synchronize that data with the servers when a connection is reestablished.

Key Survey Mobile is often used to gather important information outside of the office, such as:

HOW IT WORKS

Key Survey Platform user:

1. Create surveys and tasks.
2. Specify triggers and follow up actions where needed.
3. Assign tasks and/or surveys to the appropriate mobile users.

Key Survey Mobile App users:

1. Install Key Survey Mobile on your device.
2. Log into the app using your assigned username and password.
3. Complete surveys and tasks.
4. Manage data synchronization or setup auto-sync.

The Key Survey Mobile app is available in the Apple App Store and on the Google Play market for Android devices.

Still using laptops in the field? We didn't forget about you. Download the Windows desktop version of the Key Survey Mobile app and work remotely with your laptop online or offline without any limitations.
