

ENSURE SAFETY WITH BETTER MOBILE INSPECTIONS

Easy-to-use solutions that ensure compliance and proper execution so workers stay safe on the job.

Mobile and Offline Safety Inspection Software

Easily conduct thorough safety inspections on smart devices – with or without an Internet connection. Form.com integrates our mobile inspection app, cloud-based platform, and BI dashboards with your existing IT infrastructure to make continuous improvements and ensure compliance.

INSPECT

- Equipment
- Locations
- Procedures

MANAGE

- Data
- Tasks
- Workflow

IMPROVE

- Compliance
- Trainings
- Safety

REPEAT

- Every form
- Every job
- Everywhere

Asset Inspections

Easy-to-use mobile forms to better inspect equipment, facilities, and more, with the tools to identify and fix issues quickly.

- Integrate with existing management systems to pre-populate forms
- Forms adjust to who you are, where you are, and what you're doing
- Take and place pictures into forms, then mark them up on your device
- Embed reference information in forms for clarity and understanding

Process Audits

Quickly measure observed behaviors against predetermined safety, procedural, and operational standards, and instantly create action plans to remediate issues.

- Offline functionality enables audits even in areas with no Internet
- Auto-fill time and date stamps, GPS coordinates, and user login info
- Highlight performing/underperforming locations with BI Dashboards
- Publish action plans or single tasks with due dates and criticality levels

Site Visits

Check up on locations to improve procedures and guarantee proper execution.

- Use smart phones or tablets to replace paper-based inspections
- Automate calculations, scoring, and recommended actions
- Show compliance regulations and recommended actions for specific scenarios
- Set up workflow procedures that trigger follow-up tasks and instantly alert appropriate parties upon form completion

Incident Reports

Manage health and safety violations with standardized incident reporting.

- Automatically route reports to the right people, in and outside the company
- Generate remediation procedures for each violation at the end of inspections
- Instantly aggregate data to a BI dashboard or your current solution for faster analysis
- Track trends over time to improve adherence to regulatory compliance measures
